Date: - 13-03-2022

Objective of Project: -

- The objective of our project is to develop a social media platform for uploading photos/videos, interact with new people, communicate, like and share, comment on others post and stories.
- This platform will be user-friendly interface, where people can create an account.
- We will embed search bar to find new friend/people, post or story, mutual friend etc.
- We will try to implement an algorithm which shows the user content similar to his/her likings.
- We will also put like button to react on others post or feed.
- An automatic mail will be sent to user when someone sends new friend request or friend suggestion or event.

Tentative Web Pages details: -

- Authentication Page
- Profile page
- Setting page
- Search page
- Notification page
- Feed page
- FAQ Page
- Contact Us Page
- Feedback Page

Development Technology / Stack: -

- HTML, JavaScript
- Node JS
- Authentication, Real time database, storage
